Authorization for this examiner's amendment was given in a telephone interview with Mr. Jaglowski on 9/29/2008.

The application has been amended as follows:

- - Claim 6: A multi-level chair for supporting a post-tension concrete reinforcement cable at a fixed height from a bottom of a concrete form, said multi-level chair comprising:

an inverted V-shaped body having a pair of legs extending downwardly from an apex of said body, said body including multiple receptacles adapted to receive post-tension reinforcement cable,

said multiple receptacles comprising at least three receptacles positioned at different heights from a base of said body along at least one of said legs, the different heights being equally spaced apart heights, with each of said receptacles being sized to support substantially defining an unobstructed channel sized for post-tension reinforcement cable of a predetermined diameter, and each of said channels extending parallel to the base of the chair and across the entire body of the chair, and each of said receptacles being oriented perpendicularly to the plane defined by said V-shape, wherein a user may place said post-tension cable in a selected one of said receptacles. - -

- - Claim 12: A multi-level chair for supporting a concrete reinforcement cable under tension at a fixed height from a bottom of a concrete form, said multi-level chair comprising:

an inverted V-shaped body having a pair of legs extending downwardly from an apex of said body, each of said legs having a fixed length and multiple receptacles adapted to receive post-tension reinforcement cable,

said multiple receptacles comprising at least two receptacles positioned at different heights from ~~from~~ a base of said body along said length of said leg, wherein said multiple receptacles of one of said legs are positioned at different heights with respect to said multiple receptacles of the other of said legs, wherein said multiple receptacles are oriented perpendicularly to the plane defined by said V-shape, with each of said receptacles substantially defining an unobstructed channel sized for post-tension reinforcement cable of a predetermined diameter, and each of said channels extending parallel to the base of the chair and across the entire body of the chair, and wherein a user may support said reinforcement cable in each receptacle. - -

- - cancel claims 21 and 22. - -

Upon further review of the application it has been determined that the 112, first paragraph rejection regarding written description of claim 15 be withdrawn.
